Oklahoma Academic Standards Addressed	Recommended Method of Assessing Student Progress	Notes for Instructor
VA.CP.2 – Learn and use vocabulary and concepts related to visual arts	Can they name the different composition techniques and were they able to use them to take photos?	Review the images the student photographed and see if they used the composition techniques. Ask if they can name which technique was used in each image.
VA.P.1 – Use different media, supplies, and tools in an appropriate and safe manner in the creation of original visual artworks.	Was the student able to create visual artworks using a camera appropriately and safely?	Review the images the student produced. Were they able to create photos in a safe and appropriate way?

Note: Student progress can be measured in both summative and formative ways.

Formative assessment methods measure learning in an ongoing way, through daily or regular reflection or observation. This type of learning assessment can be used to make adjustments to instruction method as a class goes along. Methods of formative assessment can include student journals and observations, informal questions and answers, student work samples, and more.

Summative assessment measures the total learning that has taken place over a course, and can be used to compare student knowledge, behavior, and/or skills at the end of a course with that same student's knowledge, behavior, and/or skills before the class began. Methods of summative assessment include pre- and post-tests, end-of-session exams, final projects, and more.
